

Give a heart warming gift to  
your loved ones this  
Christmas

Natterjack  
Toad

This year, we at Pond Conservation are launching a Christmas ethical pond gift scheme, 'Give and Let Live', to help save Britain's most endangered freshwater wildlife

Each £1.00 that you give, will allow us to unlock a further £10.00 from the Biffaward pond digging fund, so we can create very special homes for our precious aquatic plants and animals.

Just pick one of the *eleven* amazing and wonderful creatures – from the beautiful but seriously endangered Spangled Water Beetle, to the cuddly Water Vole. You can follow our web link to find out which creature you would like to support.

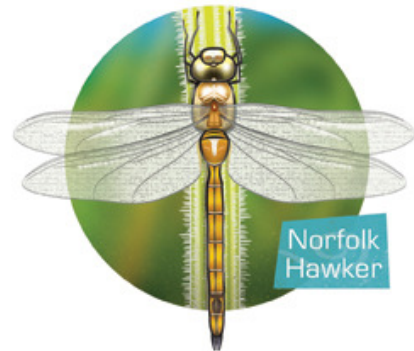

Spangled  
Water Beetle

Water Vole

We'll send you a special gift card, to pass on to your chosen recipient, with lots more information about your creature, and the ways in which your support will help to save it.

The money you gift will go directly to our Million Ponds Project, which is creating new ponds for our most endangered species and ensuring that we have a network of clean water ponds across the UK, to help them survive in the long term. Ultimately we aim to ensure that once again the UK has over one million countryside ponds. For more information please visit our web-site:

Norfolk  
Hawker
